

About Us

We provide legal services at the intersection of law and technology. We specialize in digital and emerging technologies law, and serve clients with legal needs that are technical in nature.

As dual-qualified professionals in law and technology, we understand both the regulatory frameworks governing digital innovation and the practical realities of deploying advanced tools in legal practice.

Our blend of academic insight, industry experience, and hands-on engagement means that our programs are not only informative but also practical, relevant, and aligned with the highest professional standards.

We are your trusted partner for technology law excellence!

CYBERSECURITY TRAINING

*Nelson Nkari & Co.
Advocates / Lexing® Kenya*

Our Prices

General Training (1 Hour) – **Kes 10,000 / Hour**
– Each program begins with a general session providing an overview of all modules.

Focused Modular Training – Clients who require further instruction may select specific modules for in-depth training, which is billed at the same hourly rate, with each session lasting a minimum of 30 minutes. – **Kes 10,000 / Hour (Minimum of 30 Mins Per Module)**.

**Training can be conducted on-premises or virtually.*

About this Training

Our Cybersecurity training is designed to address the unique risks faced by the legal sector, where confidentiality, trust, and compliance are of paramount importance.

We train participants on identifying common cyber threats such as phishing, ransomware, data breaches, and insider risks, and how these threats specifically target law firms and legal departments.

We then focus on implementing effective security practices within legal workflows. Participants learn how to secure digital communications, manage sensitive client files, adopt safe practices when working remotely, and implement strong password and authentication protocols. This program also addresses regulatory and ethical obligations tied to data protection and cybersecurity.

By the end of this training, participants will be better equipped to anticipate, prevent, and respond to cyber risks in ways that uphold professional standards, protect client trust, and strengthen the resilience of their institutions

KEY TRAINING MODULES

- Introduction to Cybersecurity for Legal Professionals
- Identifying and Responding to Cyber Threats (phishing, ransomware, breaches, etc.)
- Securing Digital Communication and Client Data
- Safe Practices for Remote and Hybrid Legal Work
- Developing Internal Cybersecurity Policies for Law Firms and Legal Departments
- Incident Response and Crisis Management for Cyber Breaches
- Ethical and Regulatory Requirements in Cybersecurity (Kenya and global standards)
- Building a Cybersecurity-Aware Legal Culture
