About Us

We provide legal services at the intersection of law and technology. We specialize in digital and emerging technologies law, and serve clients with legal needs that are technical in nature.

As dual-qualified professionals in law and technology, we understand both the regulatory frameworks governing digital innovation and the practical realities of deploying advanced tools in legal practice.

Our blend of academic insight, industry experience, and hands-on engagement means that our programs are not only informative but also practical, relevant, and aligned with the highest professional standards.

We are your trusted partner for technology law excellence!

*Training can be conducted on-premises or virtually.

About this Training

Our Technology Ethics and Professionalism training focuses on the ethical and professional considerations surrounding the use of legal technology and artificial intelligence tools. This program is designed to help legal professionals embrace innovation without compromising on the values, obligations, and standards of the legal profession.

In this training, we explore the ethical challenges that arise when integrating technology into legal practice, addressing issues such as confidentiality in digital communications, the responsible use of AI for legal tasks, safeguarding client data, and managing the risks associated with automation.

Additionally, we cover professionalism in the use of digital tools, including training on best practices for virtual hearings, online client interactions, and the appropriate use of remote collaboration tools.

By the end of the program, participants are well-positioned to use technology responsibly, ethically, and with the professionalism required of the legal profession.

KEY TRAINING MODULES

- Ethical considerations in the use of AI and legal technologies in legal practice
- Protecting confidentiality and data privacy in digital legal practice
- Responsible adoption of automation and AI-driven tools
- Professional conduct in virtual court proceedings and other online hearings/proceedings
- Best practices for digital client communication and remote collaboration
